

Reagan Chapple & Abigail Stalker

Problem Statement:

There are no accessible resources that compare different UofSC majors with one another in a concise and easily comprehensible manner.

Details:

While there are many descriptions of each individual major on UofSC's website, there aren't any pages dedicated to comparing the different majors. There are also third-party articles on different majors, but these do not reflect the specific differences of UofSC majors. These circumstances make it more difficult for USC students to compare majors, as the sources they are given only focus on separate parts of the issue, not on UofSC's majors as a whole. It would be helpful for UofSC students to have a resource that summarizes the different criteria and potential jobs they could find with a degree in each particular major without having to go through several sources and compile the information on their own.
